CPET Dual Ovenable Trays

Offering quality grade packaging for warm or hot meals. Our Durable packaging offers the solution to serving warm or heated meals to large school nutrition sites as well as small individualized feeding sites.

Expand menu selections

Ability to incorporate warm or heated meal options.

With a combination of hot and cold options on the menu, options are endless! Maintain and grow participation levels by offering new selections on the menu.

Reaching participants

Flexible packaging that is easy and convenient to seal & transport.

When you need to serve multiple feeding sites, having the right package is crucial. Sealability features maintain freshness as well as provide a convenient travel safe package for distributing to multiple sites

Features

- Heat up to 400° F
- Sealable
- Durable packaging & design
